SANGYAN Hackathon 2026 |

Team: CyberSaathi

Members: Surabhi Tripathi , Daksh Srivastava

THE PROBLEM

Financial scams can reach users through:

- Messages & social media
- Unrealistic return promises
- Urgent payment requests
- Requests for sensitive information

“Users need a simple way to pause, understand and verify before acting.”

SOLUTION

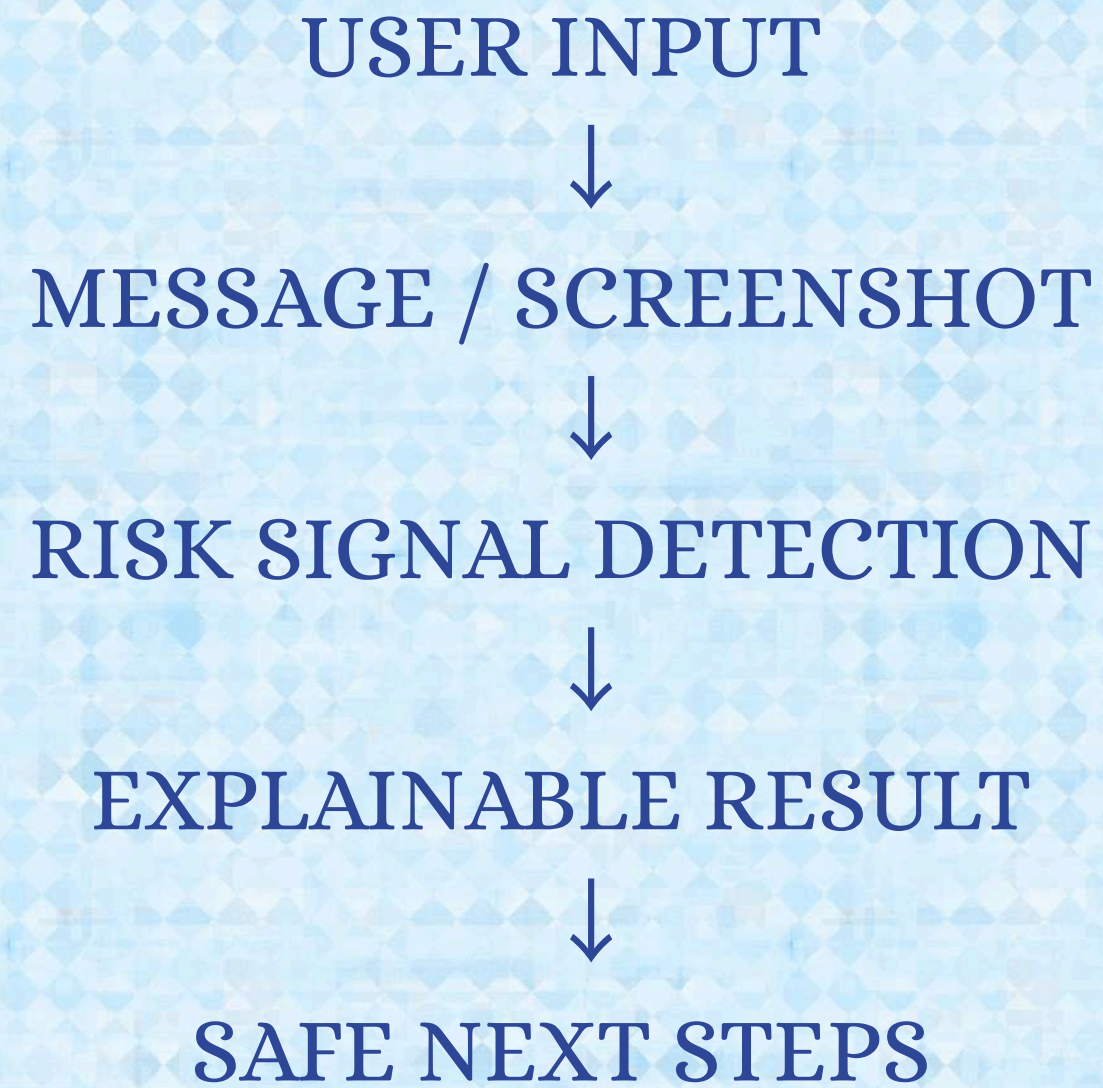

A safety-focused tool that helps users:

Not investment advice — a safety & awareness layer.

HOW IT WORKS

KEY FEATURES

1. Risk Indicators -Finds common warning signals.

2. Explainable Analysis-Shows why a signal matters.

3.Safe Next Steps-Guides users toward verification.

4.English + Hindi- Simple, accessible interface.

5.Privacy-First-No OTP, PIN or password requests

TRUST & GUARDRAILS

We Don't

- Give Buy/Sell/Hold advice
- Predict stock prices
- Promote financial products
- Ask for OTP / UPI PIN / passwords

We Do

- Highlight potential warning signs
- Explain uncertainty
- Encourage independent verification

Pause → Understand → Verify

TECHNOLOGY

Future Expansion

- Multilingual NLP
- OCR
- Voice
- More Indian Languages

Current prototype focuses on transparent, explainable risk analysis.

IMPACT & SCALABILITY

Impact

- First-time investors
- Tier-2 / Tier-3 users
- Regional-language users
- Social-media exposed users

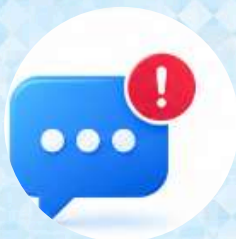

Scalability

English + Hindi
